👤 PROFILE

Highly accomplished and adaptable technology leader with ~15 years of experience, specializing in designing, implementing, and managing software and infrastructure systems across various technology stacks. Proven track record in driving DevOps transformations, leading automation initiatives, and architecting multi-cloud solutions (GCP, AliCloud, Azure). Expert in Infrastructure as Code (IaC), CI/CD pipeline optimization, and container orchestration with a focus on enhancing system reliability and developer productivity.

📁 WORK EXPERIENCE

Vice President

Feb 2023 – present | Mumbai, India

MSCI Services Pvt. Ltd

- Actively provide technical leadership and architectural design for new cloud implementations and infrastructure modernization initiatives.
- Designing and implementing infrastructure using Terraform to automate the provisioning of GCP resources, ensuring scalability, security, and cost-effectiveness.
- Collaborating with cross-functional teams to define Terraform modules, enhancing reusability and maintaining consistent infrastructure across projects.
- Managing a GKE infra consisting of 10+ clusters, supporting 100+ applications on GCP Cloud.
- Led the development and deployment of an internal GenAI-powered Chatbot to enable natural language querying of project resource data from over 40 projects. This solution delivers real-time, tabular data on key prompts, significantly improving data access and operational efficiency for Engineering and SRE teams
- Performed day-to-day operations, including deployment, configuration, scaling, and health checks of containerized workloads.
- Utilized Packer to create custom machine images for GCP, streamlining the deployment of consistent and reproducible environments.
- Orchestrated end-to-end deployment pipelines on Azure DevOps, integrating source code repositories with build and deployment processes.
- Integrated automated testing and validation steps into the deployment process, enhancing overall software quality.
- Partnered with the security team to integrate WIZ findings into the incident response process, **significantly accelerating vulnerability remediation** and strengthening the organization's overall security posture.
- Developed PowerShell and Bash scripts for automating routine tasks, improving operational efficiency and reducing manual errors.

Sr. Consultant

Apr 2017 – Feb 2023 | Mumbai, India

General Mills India Pvt Ltd

- Modernized an on-premises Hadoop cluster by migrating to the AliCloud platform, leveraging cloud-native services to enhance performance and scalability.
- Architected and deployed a highly available Tableau infrastructure (IaaS) on AliCloud, utilizing an Infrastructure as Code (IaC) approach with Terraform.
- Collaborated with cloud vendors and consulting partners in solution architecture meetings to define project roadmaps and technical requirements.
- Designed and documented a secure and scalable landing zone for a large-scale on-premises to GCP migration.
- Led the preparation and migration of on-premises servers to GCP using specialized migration tools like M4CE.
- Managed multi-cloud resources on GCP and AliCloud, deploying and configuring compute, storage, and networking services for enterprise applications.
- Utilized a wide range of GCP services including Compute Engine, GKE, GCS, and IAM to build and maintain cloud solutions.
- Leveraged key AliCloud services such as ECS, SLB, Kafka MQ, and OSS to support critical business operations.
- Engineered a fully automated pipeline using Packer and GitHub Actions to build and maintain golden Windows OS images, ensuring consistency across deployments.
- Developed a reusable PowerShell module with over 12 custom functions for the administration and management of HPE iLO

Technical service specialist

IBM India Pvt Ltd.

Apr 2016 – Mar 2017 | Hyderabad, India

Client : SONY

- Administered a virtualization infrastructure of over 180 ESXi hosts.
- Administered a large-scale environment of over 4000 Windows servers, encompassing both physical and virtual machines.
- Created and managed virtual machines, templates, and clones to meet project and operational requirements.
- Performed live vMotion, Storage migrations, and resource upgrades on virtual machines with minimal downtime.
- Designed and configured VMware clusters to ensure High Availability (HA) and optimal load balancing with Distributed Resource Scheduling (DRS).
- Executed large-scale Physical-to-Virtual (P2V) and Virtual-to-Virtual (V2V) migrations to modernize the VMware environment.
- Served as the final escalation point for L1 and L2 support teams on critical infrastructure issues.

Consultant

Capgemini India Pvt Ltd.

Oct 2014 – Oct 2016 | Mumbai, India

Client : Total Petrochemical

Level 2 & 3 support for windows platform team.

IT Operations Analyst

Accenture Services Pvt Ltd.

Sep 2010 – Oct 2014 | Mumbai, India

- Level 2 server support engineer for Accenture's internal infra team

IT Infra Engineer

MindTree & 7Strata Pvt Ltd

Jan 2009 – Aug 2010 | Mumbai, India

- Level 1 Desktop support engineer.

SKILLS

GCP • AliCloud • Azure • VMware • Windows • Linux • Powershell • Terraform • Packer • Active Directory • Bash • SCCM • GitHub • Docker • GKE • GenAI • Architecture / System Design

CERTIFICATES

- ITIL v3 Foundation
- MCITP in Windows 2K18
- MCTS in SCCM 2K12
- AZ-900
- GCP-ACE

EDUCATION

Diploma in Computer Software

S.H. Jondhale (Mumbai University)

LANGUAGES

English, Hindi, Marathi
